

One pad. Up to 10 uses.

Cotton oil-only pads that pick up oil, leave water, and go back to work. Up to 0.4 gallons per pad and 40 gallons per case.

WHY GREEN BOOM

UP TO **10x**

Uses. Wring out and reuse each pad up to 10 times before it is spent.

Zero

Plastic. Cotton fabric replaces meltblown polypropylene. Nothing synthetic goes in the bin.

Less

Waste. Reuse plus higher capacity means far fewer pads bought, bagged, and hauled.

FOR LAND & WATER

ITEM	DIMENSIONS	ABSORBS PER PAD	PER CASE	ABSORBS PER CASE	CASE WEIGHT	PART NO.
Oil-only pad	15" x 20"	up to 0.4 gal	100	up to 40 gal	20.5 lb	M2015

Completely hydrophobic · UV-resistant cotton fabric · Agglomerates and locks in oil for easy cleanup · Passes TCLP

LOWER TOTAL COST

Spend less on every spill, **from first use to final disposal.**

+ Buy fewer pads

Use each pad up to 10 times instead of once.

+ Order less often

A 100-pad case goes much further when every pad works several times.

+ Pay less to dispose

Fewer spent pads, and no plastic, in the waste stream.

CERTIFIED 100% BIOBASED
USDA BioPreferred® and DIN
CERTCO certified. Passes TCLP,
independently tested.

REINVENTING OIL-ONLY ABSORBENTS

Single-use plastic pads pile up fast.

Polypropylene pads are single-use plastic: used once, soaked in oil, and landfilled for good. Green Boom pads replace that plastic with plant-based material that is tougher, heat resistant, reusable, and compostable.

SIDE BY SIDE

POLYPROPYLENE PADS

- ✗ **Single-use plastic**
Polypropylene pads are made of plastic.
- ✗ **Melts under heat**
Polypropylene melts at about 320°F (160°C).
- ✗ **Tears after use**
Soaked mats shred and fall apart.
- ✗ **Used once**
Soaked, bagged, and thrown out after one job.
- ✗ **In a landfill forever**
Oil-soaked plastic never breaks down.

GREEN BOOM PADS

- ✓ **Plant-based, zero plastic**
Natural fiber and cotton. No polypropylene.
- ✓ **Heat resistant**
Lay under hot engines. No melting.
- ✓ **Super-tough skin**
Patented cotton skin resists tears and abrasion.
- ✓ **Reuse up to 10 times**
Wringing out and put the same pad back down.
- ✓ **Compostable**
With Oily™, compost it where allowed.

WHERE IT ENDS UP

BETTER FOR THE PLANET

Same job. **None of the plastic.**

+ Cut plastic waste

Every pound of Green Boom replaces a pound of plastic.

+ Hit your goals

USDA Certified Biobased, for sustainability reports.

+ Buy fewer

Tough, reusable pads need replacing less often.

REINVENTING OIL-ONLY ABSORBENTS

ENVIRONMENTAL BENEFIT · PADS

One case of pads keeps 54 lb of plastic out of the waste stream.

Cotton oil-only pads replace meltblown polypropylene. Wring them out and reuse each one up to 10 times, so you buy and throw away far fewer.

PER CASE OF 100 PADS · M2015

PER CASE

SIZE	PER CASE	PLASTIC AVOIDED	FOSSIL CO ₂ AVOIDED	...IF IT WOULD BE BURNED	CO ₂ TAKEN UP BY PLANTS	GROCERY BAGS' WORTH
15" × 20" M2015	100	54.0 lb	84 lb	253 lb	31 lb	4,454

EXAMPLE SITE · REPLACING 2,400 POLYPROPYLENE PADS A YEAR

Green Boom pads needed (each reused 3×)	8 cases
Plastic kept out of the waste	432 lb
Fossil CO ₂ avoided	670 lb
...if it would have been burned	2,026 lb
Grocery bags' worth of plastic	35,628
Miles of driving, same fossil CO ₂	752
Fewer pads bought than today	1,600

WHY IT MATTERS

- **Reuse cuts purchases.** At 3 uses a pad, a site buys a third as many pads. At 10 uses, a tenth.
- **Zero plastic.** Cotton and natural fiber, nothing for the plastic report.
- **Oil only.** Picks up oil and leaves water, on the floor or on the water.
- **Passes TCLP.** Independently tested to the U.S. EPA leaching procedure.

How we figure it. Fossil CO₂ is the CO₂e from making the polypropylene you no longer buy: 1.55 lb per lb (American Chemistry Council, 2021, cradle-to-gate PP resin); add 3.14 lb per lb if spent absorbent is incinerated or fuel-blended. Plant uptake is about 1.5 lb of CO₂ per lb of Green Boom fiber, shown separately, not added. Polypropylene weights are industry-typical (pad 0.18 lb, 3" × 48" sock 0.9 lb, 18" pillow 1.3 lb, 5" × 10 ft boom 4.5 lb); other sizes scaled. A grocery bag is about 5.5 g. Green Boom manufacturing and shipping are not included. Results vary by site. Same factors as the calculators at greenboom.com › Waste & Cost Savings.
